Penyelenggaraan aktivitas audit diawali dengan pembuatan rencana kerja audit tahunan (*audit plan*) yang disusun menggunakan pendekatan berbasis risiko. *Audit universe* ditinjau berdasarkan berbagai sudut pandang, baik unit kerja (entitas bisnis), proses bisnis. Pemilihan prioritas objek audit dilakukan berdasarkan profil risikonya (*risk based internal audit*).

Berbagai metode telah digunakan dalam penugasan audit, yaitu teknik pengambilan *sampling*, teknik wawancara, kriteria penyusunan audit *evidence* dan dituangkan secara terstandarisasi dalam kertas kerja audit. Untuk mendukung proses analisa, para auditor dibekali dengan standar perangkat alat kerja yang memadai dan mutakhir.

AUDIT METHOD

SKAI has established audit implementation standards as set out in Policy No. 0621/SK/DIR-AI/2019 dated May 29, 2019 concerning Internal Audit Policy. The implementation of audit activities begins with the preparation of an annual audit plan, which is developed using a risk-based approach. The audit universe is reviewed from various perspectives, including work units (business entities) and business processes. The prioritization of audit objects is determined based on their risk profile (risk-based internal audit).

Each individual audit engagement begins with an in-depth analysis during the preparation phase (preliminary survey), ensuring that the execution of field audits is properly targeted. Various methods are applied in audit assignments, including sampling techniques, interview techniques, and criteria for the preparation of audit evidence, all of which are documented in a standardized manner within audit working papers. To support the analysis process, auditors are equipped with adequate and up-to-date standard tools and working equipment.

Adapun penjelasan mengenai risiko-risiko tersebut dan upaya pengelolaannya adalah sebagai berikut:

1. Risiko Kredit
   Terkait proses identifikasi, pengukuran, pemantauan, dan pengendalian risiko kredit, bank **bjb** telah melakukan hal-hal sebagai berikut:

Risk Profile and Management

The eight inherent risks include credit risk, liquidity risk, market risk, operational risk, strategic risk, compliance risk, legal risk, and reputational risk, with additional risks being intra-group transaction risk and insurance risk. The explanations of these risks and their management efforts are as follows:

1. Credit Risk
   Regarding the process of identifying, measuring, monitoring, and controlling credit risk, bank **bjb** has carried out the following:

a. Bank secara berkala melakukan analisa menyeluruh atas aspek internal dan eksternal bank melalui *Root Cause of Credit Risk* (RCCR) yang berisi analisa penyebab penurunan kolektibilitas debitur yang berdampak pada timbulnya *Non Performing Loan* (NPL).

b. Bank melakukan perhitungan *Stress Test* Risiko Kredit yang disampaikan kepada Direksi dan Dewan Komisaris. Pelaksanaan stress test dilakukan dengan pendekatan portfolio level dan bertujuan untuk menghitung pengaruh kondisi *shock* makro ekonomi terhadap peningkatan NPL secara *bankwide*. Pelaksanaan perhitungan menggunakan satellite model yang meliputi baik kredit produktif maupun kredit non-produktif pada seluruh sektor ekonomi. *Satellite model* tersebut merupakan perhitungan regresi multiple yang menghubungkan kondisi makro ekonomi sebagai *independent variable* dan NPL sebagai *dependent variable*.

c. Selanjutnya secara berkala disusun laporan perkembangan eksposur risiko kredit yang disusun dalam rangka mitigasi risiko dan sebagai upaya perbaikan segera sesuai perkembangan tingkat risiko. Pemantauan atas kualitas portofolio kredit yang dilaporkan secara berkala kepada Direksi melalui hal-hal sebagai berikut:
   1) *Review* dan evaluasi berkala melalui pelaksanaan *business review* termasuk diantaranya pembahasan mengenai posisi serta kualitas portofolio kredit.
   2) Kaji ulang atas potensi risiko dalam aktivitas perkreditan yang dilaporkan secara independen oleh Satuan Kerja Manajemen Risiko.

2. Risiko Pasar

Adapun upaya pengelolaan Risiko Pasar yang telah dilakukan bank **bjb** adalah sebagai berikut:

The implementation of stress tests is carried out using a portfolio level approach and aims to calculate the effect of macroeconomic shock conditions on bank-wide NPL increases. The calculation uses a satellite model covering both productive and nonproductive loans in all economic sectors. The satellite model is a multiple regression calculation that connects macroeconomic conditions as the independent variable and NPL as the dependent variable.

c. Further compiled reports on the progress of credit risk exposure that are arranged in order to mitigate risk and as an effort to repair immediately according to the development of risk level. Monitoring of the quality of credit portfolio reported periodically to the directors through the following matters:
